EXECUTIVE SUMMARY

Trihydro Corporation (Trihydro) performed a Phase I Environmental Site Assessment (ESA) for the North Valley Public Library in Stevensville, Montana and the Montana Brownfields Program on the property located at 208 Main Street, Stevensville, Montana (Subject Property). The Subject Property Property Identifiers are 13-1764-27-1-12-10-0000/13-1764-27-1-12-09-0000 and 0000228300/0000228600. The original building was constructed in 1910 and 1940 and remodeled and added on to in 1960. The Site is currently owned by the North Valley Library District.

Trihydro visited the Subject Property to perform the Phase I ESA reconnaissance on April 8 through 11, 2023. The scope of services for this ESA and the performance of the professional services rendered were in general accordance with the current industry practices, as conducted by similarly qualified practitioners. The scope of work included the general provisions of the American Society for Testing and Materials (ASTM) Standard E 1527-21, *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment*. Trihydro understands that there are plans to relocate the library in 2023 and sale and renovation/redevelopment of the current structure(s) could be impeded by the potential for hazardous building materials, including asbestos, particularly in the upper floor area.

This Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* (RECs), *historic RECs* (HRECs), *controlled RECs* (CRECs), business environmental risk (BER) and/or potential environmental compliance issues in connection with the Site. Based upon site observations, interviews of key personnel, and data file reviews, the following RECs, HRECs, CRECs, and BERs were identified:

Environmental Conditions or Risks	Number Identified Onsite	Number Identified Offsite	Description
REC	0	0	No RECs identified at this time.
HREC	0	0	No HRECs were identified at this time
CREC	0	0	There are no activity use limitations noted for the Subject Property or adjacent properties, nor are there any records of active remediation systems or actions at the Subject Property.
BER	1	0	Due to the age of the buildings, asbestos-containing materials (ACM) may be present and previous abatement activities have occurred. A Phase II including ACM sampling was performed and will be submitted under separate cover. The potential for ACM is considered a BER.

The following table provides an overview summary of Phase I ESA topics by report section:

Topic	No Further Action	REC, HREC, CREC or Business Environmental Risk	Report Section	Comment
Property Location	X		2.1	The Subject Property is located in a downtown mixed commercial/residential area.
Topography and Surface Water Drainage	X		2.2	The Subject Property is relatively flat and largely covered by buildings, concrete, and parking areas.
Subject Property History		BER	3.10	Suspected asbestos containing materials were spilled outside the site in 2014; asbestos containing materials were abated in 2015, 2016, and 2017. Due to the age of the buildings asbestos is likely in building materials. A Phase II report regarding asbestos and lead-based paint will be submitted under separate cover.
Previous Environmental Assessment	X		3.11	A previous mold survey was provided.
Regulatory Agency Review	X		4.0	No Concerns Identified
Vapor Encroachment Screening	X		4.3	No Concerns Identified
Current Use	X		5.1.1	No Concerns Identified
Hazardous Substances and Petroleum Product Storage	X		5.1.2	No Concerns Identified
Solid and Hazardous Waste	X		5.1.3	No Concerns Identified
Underground Storage Tanks (USTs)	X		5.1.4	No Concerns Identified
Aboveground Storage Tanks (ASTs)	X		5.1.5	No Concerns Identified
Wastewater	X		5.1.6	No Concerns Identified
Stormwater and Surface Drainage	X		5.1.7	No Concerns Identified

Topic	No Further Action	REC, HREC, CREC or Business Environmental Risk	Report Section	Comment
Polychlorinated Biphenyls (PCBs)	X		5.1.8	No Concerns Identified
Landfills	X		5.1.9	No Concerns Identified
Surface Impoundments	X		5.1.10	No Concerns Identified
Railroads	X		5.1.11	No Concerns Identified
Water Wells	X		5.1.12	No Concerns Identified
Oil and Gas Wells	X		5.1.13	No Concerns Identified
Pipelines	X		5.1.14	No Concerns Identified
Utilities	X		5.1.15	No Concerns Identified
Evidence of On-Site Releases	X		5.1.16	No Concerns Identified
Surrounding Properties	X		5.2	No Concerns Identified

Trihydro has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21. Any exceptions to, or deletions from, this practice are discussed in Section 1.7 of this report.

1.0 INTRODUCTION

Trihydro Corporation (Trihydro) performed Phase I and Environmental Site Assessment (ESA) inspection for the North Valley Public Library and Montana Department of Environmental Quality (DEQ) Brownfields Program on the property located at 208 Main Street, Stevensville, Montana (Subject Property). The Subject Property consists of two adjacent parcels. The legal description of the Subject Property is: “STEVENSVILLE ORIGINAL TOWNSITE, S27, T09 N, R20 W, 2800 SQUARE FEET, N 14' OF LOT 17 S 14' OF LOT 18 BLK 15 RETRACED BY CS# 634728-TR” and “STEVENSVILLE ORIGINAL TOWNSITE, S27, T09 N, R20 W, BLOCK 015, LOT 018, 5887 SQUARE FEET, N 28' OF LOT 18 S 24' OF LOT 19 W 68' OF S 10' OF N 18' LOT 19 BLOCK 15 STEVENSVILLE RETRACED BY CS#634728-TR” and its property identifiers are 13-1764-27-1-12-10-0000/13-1764-27-1-12-09-0000 and 0000228300/0000228600. Historically, the Subject Property has served as a restaurant, bakery, housing, grocery store, electric repair shop, and a home décor retail store. Currently, the Subject Property serves as a library for the North Valley Library District. It is Trihydro’s understanding that Subject Property renovations are planned for 2023. Trihydro also understands that due the construction and renovation history, the building shall be examined for potential contaminants and environmental conditions prior to redevelopment or building sale efforts.

1.1 PURPOSE AND OBJECTIVES

This Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* (RECs), *historical RECs* (HRECs), *controlled RECs* (CRECs), business environmental risks (BERs) in connection with the Subject Property. As defined by American Society for Testing and Materials (ASTM) E 1527-21, “The term recognized environmental condition means (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.”

The term HREC as used throughout this report, is cited from Section 3.2.39 of ASTM E 1527-21. This term is defined as “a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental

condition is not a recognized environmental condition.” In other words, it is an environmental condition which has been dealt with appropriately so that it no longer limits the property’s use.

The term CREC as used throughout this report, is cited from Section 3.2.17 of ASTM E 1527-21. CREC is defined as a “recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)”. This term applies to sites where contamination is present and is controlled but could still pose ongoing or future obligations for the owner, such as special precautions during development. Properties that may be present in this category would be those with deed restrictions, vapor barriers, or other engineering controls designed to eliminate exposure pathways to human and/or environmental receptors. The term business environmental risk (BER) as used throughout this report, is cited from Section 3.2.11 of ASTM E 1527-21. This term applies to “a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.”

1.2 SCOPE OF SERVICES

The scope of work for the Phase I ESA was prepared per DEQ’s request and was conducted following the ASTM Standard E 1527-21, *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process*. Major elements of this ESA include the following items:

- Site investigation walk-through identifying suspect hazardous materials.
- Site inspection and reconnaissance of the site and surrounding properties in immediate proximity to the site.
- Review of State and Federal databases.
- Review of historic uses of the site and adjoining property.
- Review of Sanborn Maps and aerial photographs (as readily available).
- Review of available records on-file for the site and/or nearby properties, where warranted.
- Interviews with knowledgeable persons regarding the site and/or nearby properties.
- Review of previous environmental investigations, if available.

1.3 SIGNIFICANT ASSUMPTIONS

The information obtained from individuals interviewed and the databases reviewed are considered to be accurate unless otherwise noted. The scope of work was based solely upon the condition of the Subject Property and surrounding properties on the date of the site visit, April 8 through 11, 2023.

1.4 LIMITATIONS

The scope of services for this ESA and the performance of the professional services rendered were in general accordance with the current industry practices, as conducted by similarly qualified practitioners. The scope of work included the general provisions of the ASTM Standard E 1527-21, *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment*.

The Phase I ESA was limited to visual observation of surface conditions at the Subject Property and a review of reasonably ascertainable data. For the purposes of this ESA, reasonably ascertainable data are defined as a regulatory database, historical aerials, and topographic maps that could be readily obtained through a commercial source, information provided by representatives of the Subject Property, and interview information that could be obtained from individuals available during the site reconnaissance. The information obtained was not further verified, unless the information was known to be incorrect or conflicted with other information that was obtained. In addition, unidentified facilities, which are required to comply with environmental regulations, may be present within the search distance but were not documented in regulatory agency records. Trihydro does not guarantee the completeness or accuracy of the regulatory agency database records.

The Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the potential for various RECs, HRECs, CRECs, and BERs in connection with the Subject Property. In addition, this assessment did not include a regulatory compliance evaluation, including local, state, and federal permitting and reporting requirements. State and federal regulations are subject to change. Certain conditions, if present, such as those listed below, are not within this scope of work.

- Regulatory compliance
- Health and safety, and industrial hygiene
- Radon and other naturally occurring radioactive materials
- Lead in drinking water
- Indoor air quality

- Recycling and disposal of electronic waste (e-waste)
- Drinking water quality
- Health effects of electromagnetic radiation from high-voltage power lines
- Naturally occurring toxins in the subsurface soils, rocks, water, or toxicity of on-site flora
- Biological hazards
- Geological faults
- Ecological resources
- Cultural and historical resources
- Subsurface contamination including emerging contaminants in soil or groundwater

1.5 SPECIAL TERMS AND CONDITIONS

The User of this Phase I ESA and Building Inspections is defined as the party seeking to use ASTM E 1527-21 to complete an ESA and is identified as North Valley Public Library.

1.6 USER RELIANCE

This report has been prepared solely for use by the North Valley Public Library and Montana DEQ. This report should not be relied upon by third parties without written authorization and signed agreement from Trihydro.

1.7 DATA GAPS

Data gaps are defined by ASTM E 1527-21 as the lack or inability to obtain information despite good faith efforts that could potentially affect the ability of the environmental professional from identifying RECs. The following data gaps were:

- The complete collection of Building Permit data available to EDR has been searched (Appendix A), and as of February 1, 2023, EDR does not have access to building permits in the city where the target property is located (Stevensville, MT).

The identified data gaps do not impact the findings of this Phase I ESA.

1.8 ENVIRONMENTAL PROFESSIONAL STATEMENT AND SIGNATURE

This Phase I ESA was prepared by Andrew Vann, of Trihydro Corporation (Trihydro). Mr. Vann is a Professional Engineer in Montana (19666). Mr. Vann was assisted in report preparation by Mr. Joel Riebli who performed the Subject Property site visit on April 8-11, 2023, interviewed the Subject Property owner, and conducted data collection and reporting efforts. Resumes are included in Appendix K.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR § 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional's Signature

Date

2.0 LOCATION AND ENVIRONMENTAL SETTINGS

This section describes the location and environmental setting of the Subject Property. The environmental setting is generally comprised of the site location, topographic setting, surface water features, geology, and hydrogeology in the vicinity of the Subject Property. A summary of the reasonably available information related to these topics is included below.

2.1 SUBJECT PROPERTY LOCATION AND DESCRIPTION

The Subject Property is located at 208 Main Street, Stevensville, Montana (Figure 1). The Subject Property is located within an area that is mostly commercial (Figure 2) at an approximate latitude of 46.510814 North and longitude of -114.092828 West. Photographs of the Subject Property are provided in Appendix B.

2.2 TOPOGRAPHY AND SURFACE WATER DRAINAGE

Based on a review of the 2020 United States Geological Survey (USGS) Stevensville, MT, 7.5-minute Topographic Map and observations of the Subject Property topography from the EDR Topographic Maps (Appendix C); the Subject Property has a general WNW topographic gradient, with an average elevation of approximately 3,322 feet (ft) above the National Geodetic Vertical Datum. According to information contained within the EDR Physical Setting Report (Appendix D), the Subject Property does not lie within areas are classified by the U.S. Fish and Wildlife Service (USFWS) as being included in the National Wetlands Inventory (NWI) or within any Federal Emergency Management Agency (FEMA) flood zones.

2.3 SURFACE SOILS

According to the EDR Radius Map Report (Appendix D), the Subject Property is located within an area where the surface soils are generally classified as fine-grained silt-clay mixtures. Additional subordinant soil types that cobbly to silty clay loam. The moderately fine or fine soil textures likely impede downward movement of water. Soils in this group have moderately high runoff potential when thoroughly wet, are somewhat poorly drained, and water transmission through the soil is somewhat restricted. The only observed surface soils on the property are located east of the buildings and extend into the alleyway. The western portion of the property is covered by concrete. Surface drainage from the building roofs is concentrated into gutters before being released on the surface soils east of the buildings.

2.4 GEOLOGY AND HYDROGEOLOGIC SETTING

Ravalli County is located in the western part of Montana and is situated within the Rocky Mountain province, in the Bitterroot Valley, east of the Bitterroot Mountains. The geology of the Bitterroot Valley includes extensive coarse-grained, water-yielding deposits that are not found in other basins in southwest Montana. Tertiary and Quaternary sediments overlie bedrock throughout the basin. These unconsolidated surficial deposits consist of alluvium and glacial till (USGS 2000).

The most prevalent geologic units reported for Ravalli County include Cretaceous granitic rock, Tertiary granitic rock, the Belt Supergroup, and the Piegan Group (URL: <https://mrdata.usgs.gov/geology/state/fips-unit.php?code=f30081>). The Cretaceous granitic rock covers 31% of the surface area. The Tertiary granitic rock covers 17% of the surface area. The Belt Supergroup is a large assemblage of 25+ formations and covers approximately 9% of the surface area. The primary constituents are fine-grained sedimentary rocks and mafic intrusive rocks of late Precambrian age. The Piegan Group, which covers 7% of the area, consists of the Helena and Wallace Formations.

The information contained in the EDR Radius Map Report (Appendix D) indicates that the depth to groundwater is approximately 1-3 feet at the Subject Property, and 66 permitted water wells were reported within a 1-mile radius of the Subject Property. Based on the site visit Trihydro suspects the depth to groundwater is at least 6 feet as there was no evidence of water in the basements. Review of well information indicates that the total depths of wells vary greatly, from approximately 5 feet below ground surface (ft bgs) to 540 ft bgs and static water levels vary from approximately 2 ft bgs to 143 ft bgs. The soil is generally described as fine-grained silt-clay mixtures, which indicates low hydraulic conductivity. Subordinant soil types that may appear include cobbly to silty clay loam.

3.0 HISTORICAL USE OF PROPERTY

The historical use of the Subject Property was evaluated to identify whether potential RECs, HRECs, CRECs, or BERs exist at the Subject Property. Included in the historical use assessment were aerial photographs and topographic maps, interviews with the on-site contacts, and state agencies (as needed).

3.1 CHAIN OF TITLE REVIEW, AND ENVIRONMENTAL LIEN SEARCH, TAX MAP, AND APPRAISAL

An environmental lien search is conducted to aid in identifying whether the Subject Property has been assigned an environmental clean-up lien, or other activity and use limitation, such as engineering controls or institutional controls. An Environmental Lien search was conducted by EDR. No liens or Activity and Use Limitations (AULs) were found associated with the Subject Property. A copy of the EDR Environmental Lien and AUL search is included in Appendix E. The building is a combination of three older buildings and one new addition. A second floor is present in one area of the structure. Historically, the property has served as a restaurant, bakery, housing, grocery store, electric repair shop, home décor retail store, and a library. Trihydro requested copies of Ravalli County Property Information for the Subject Property. A copy of the EDR Property Tax Map report is included in Appendix F. No coverage is reported. The Town of Stevensville approved the property transfer to the North Valley Library District on December 13, 2004, and was reaffirmed on October 13, 2009.

3.2 HISTORICAL AERIAL PHOTOGRAPH REVIEW

Historical aerial photographs are reviewed to aid in establishing prior land uses and to identify on-site activities or surface features that might indicate a REC, HREC, or BER. Historical aerial photographs were requested from a commercial source, EDR, and are included in Appendix G. The dates of the aerial photographs range from 1954 to 2019. Trihydro reviewed the photographs, and each photograph is discussed below.

Year/Scale	Subject Property	Northern Adjacent Property	Eastern Adjacent Property	Southern Adjacent Property	Western Adjacent Property
2019 1" = 500'	The Subject Property appears mostly unchanged since 2006.	The property appears mostly unchanged since 2006.	The property appears mostly unchanged since 2006.	The property appears mostly unchanged since 2006.	The property appears mostly unchanged since 2006.

The photo resolution is poor, and detailed observations are not possible.	The photo resolution is poor, and detailed observations are not possible.	The photo resolution is poor, and detailed observations are not possible.

3.3 HISTORICAL TOPOGRAPHIC MAP REVIEW

Historical topographic maps were reviewed to help establish prior land use and to identify on-site activities that might indicate a potential REC or obvious surface features. A chronological evaluation of the USGS topographic maps and descriptions of the Subject Property and adjacent properties are listed below. A copy of the EDR Topographic Map Research Results is included as Appendix C.

Year/Scale	Subject Property	Northern Adjacent Property	Eastern Adjacent Property	Southern Adjacent Property	Western Adjacent Property
1908/1912 1" = 125,000'	The Subject Property exists within an area of urban development	Developing with structures	Developing with structures	Developing with structures	Developing with structures
1967/ 1" = 24,000	Urban Development	Urban Development	Urban Development	Urban Development	Urban Development
1998/1999 1" = 24,000'	Urban Development	Urban Development	Urban Development	Urban Development	Urban Development
2014/ 1" = 24,000'	Urban Development	Urban Development	Urban Development	Urban Development	Urban Development
2017/ 1" = 24,000'	Urban Development	Urban Development	Urban Development	Urban Development	Urban Development
2020/ 1" = 24,000'	Urban Development	Urban Development	Urban Development	Urban Development	Urban Development

3.4 REVIEW OF CITY DIRECTORIES

A search of available city directories was requested from EDR for the Subject Property. The EDR City Directory Report evaluated business directories including city, cross reference, and telephone directories at various intervals spanning 1992 through 2017. A chronological evaluation of the Subject Property is listed below. A copy of the Historical Directory Report is included in Appendix H.

Year	Source	Address	Tenant
2017	EDR Digital Archive	208 Main Street	North Valley Public Library
2014	EDR Digital Archive	208 Main Street	North Valley Public Library
2010	EDR Digital Archive	208 Main Street	North Valley Public Library
2005	EDR Digital Archive	208 Main Street	North Valley Public Library
2000	EDR Digital Archive	208 Main Street	North Valley Public Library
1995	EDR Digital Archive	208 Main Street	North Valley Public Library

3.5 FIRE INSURANCE MAP REVIEW

Fire insurance maps (Sanborn) were developed in the mid 1800's to determine insurance rates by identifying fire hazards (such as gasoline), building construction materials, and the location of fire protection equipment and fire stations. A search of the EDR Fire Insurance Map Research Results (Appendix I) for the Subject Property indicates that fire insurance maps covered the Subject Property and surrounding areas in 1893, 1896, 1909, 1927, and 1944.

Year	Subject Property	Northern Adjacent Property	Eastern Adjacent Property	Southern Adjacent Property	Western Adjacent Property
1893	Developed with a general merchandise warehouse, lodging, and other buildings.	2 nd Street and across the street, developing property.	Alley, and then mostly vacant, undeveloped property.	Developed with a barber shop and other buildings.	Main Street, and then developed property with various buildings.
1896	Developed with a general merchandise warehouse, lodging, and other buildings.	2 nd Street and across the street, developing property.	Alley, and then mostly vacant, undeveloped property.	Developed with a barber shop and other buildings.	Main Street, and then developed property with various buildings and stores.

Year	Subject Property	Northern Adjacent Property	Eastern Adjacent Property	Southern Adjacent Property	Western Adjacent Property
1909	Developed with a general merchandise warehouse and a meat store.	2 nd Street and across the street, developing property including a barber shop and drug store.	Alley, and then developing property including a horse shed and warehouses.	No properties identified.	Main Street, and then developed with a bank.
1927	Developed, but mostly vacant property.	2 nd Street and across the street, developed property including an auto repair shop and gas and oil storage.	Alley, and then developing property including a cobbler and furniture repair shop, and dwellings.	No properties identified.	Main Street, and then developed with a hotel and feed mill.
1944	Developed with a hotel, warehouse, and other property.	2 nd Street and across the street, developed property including an auto repair shop and gas and oil storage.	Alley, and then developed property including a furniture repair shop.	Developed with an auto supply store, including an oil warehouse.	Main Street, and then developed property including several stores.

In addition to the adjacent properties, the 1944 Sanborn map also identified the City Hall and Fire Station to the southwest of the Subject Property and an auto service shop with gasoline and oil to the northwest.

3.6 INTERVIEW WITH PROJECT MANAGER/CONSULTANTS

During the Phase I ESA process, Trihydro conducted interviews with individuals knowledgeable of the Subject Property history. The individuals and their title that participated during the interview is:

- Mr. Joel Riebli – Trihydro Environmental Engineer
- Mr. Casey Hooton – Trihydro Assistant Staff Geologist

3.7 INTERVIEW WITH OFF-SITE PROPERTY OWNERS/KNOWLEDGEABLE PERSONS

No off-site property owners were interviewed as part of this Phase I ESA. North Valley Public Library District Assistant Librarian Caryn Carpenter was interviewed on April 8, 2023, when given the access to the site structure.

3.8 INTERVIEW WITH FIRE MARSHAL AND BUILDING DEPARTMENT

Building department and fire department records were requested from the Town of Stevensville on June 15, 2023. The Town responded on June 20, 2023, and informed Trihydro that there were no building permits associated with this address. The Stevensville Fire Department reported no records of fires at the Subject Property.

3.9 INTERVIEW WITH STATE AGENCIES

Based on the regulatory review and the site reconnaissance, no interviews were required.

3.10 SUBJECT PROPERTY HISTORY

According to information provided by Caryn Carpenter, North Valley Public Library District Assistant Librarian, the Subject Property has asbestos materials in the second-floor portion of the southern-most building and above the ceiling in the Montana room located in the southeastern portion of the library. The second floor was at one point a wallpaper retail area but now contains loose insulation and has restrictions on storing items on this floor. **Based on the asbestos containing material that has been removed from the Subject Property between 2015 and 2017, along with observed suspect asbestos material spilled in 2014, this is identified as a BER (Section 4.1.2).** A Phase II regarding ACM and lead-based paint will be submitted under separate cover.

3.11 PREVIOUS ENVIRONMENTAL ASSESSMENT

DEQ provided a December 2010 Northern Industrial Hygiene Inc. microbial air sampling report initially provided to the North Valley Public Library that was conducted in November 2010 to determine if microbial growth was occurring in the two basement/crawlspace areas of the buildings. Basement area beneath the Montana Room had an air result of 9,366 spores/cubic meter. A result of this amount found beneath the Montana Room is a moderate spore level at which some individuals may become sensitive to pollens and molds (Northern Industrial Hygiene, 2010).

3.12 USER PROVIDED INFORMATION

The ASTM E 1527-21 Standard requires that the environmental professional request information (as described below) from the User of the Phase I concerning the Subject Property that will help identify the possibility of RECs, HRECs, CRECs, or BERs in connection with the Subject Property. It is the User's responsibility to provide the names of individuals/entities who can provide this information. The User Questionnaire was completed with the North Valley Public Library District Assistant Librarian, Caryn Carpenter, while walking around the Subject Property and identifying locations of utilities, and access points to the two basements, second floor, storage rooms, and attic. A copy of the questionnaire is provided in Appendix J.

Information provided on the questionnaire indicated that asbestos may be present due to the age of the building and in the loose insulation present above the Montana Room and second floor portion of the building. A soft floor was noted in the library director's office, as a possible moisture leak. No additional environmental issues were provided.

4.0 REGULATORY RECORD REVIEW

Trihydro reviewed relevant and readily available selected federal, state, and Tribal regulatory lists in order to identify recorded information concerning environmental impacts, conditions, or concerns in association with the Subject Property and/or surrounding properties.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

A regulatory agency database list was obtained from EDR and reviewed to identify listed hazardous material sites located on and within the vicinity of the Subject Property. EDR reportedly updates their records on a monthly or quarterly basis, as required. This commercial (EDR) records review reportedly included information that was reasonably ascertainable, publicly available, and retrievable by geographic location in relation to the Subject Property. A copy of the Database Report is included as Appendix D.

4.1.1 FEDERAL, STATE, AND TRIBAL LISTS

A Trihydro Environmental Professional reviewed the databases provided by EDR, including the approximate minimum search distances, and the number of facilities identified within the search distances. The databases were selected by EDR based on the minimum requirements of ASTM E 1527-21.

4.1.2 LISTED FACILITIES

The Subject Property was identified in two EDR databases.

- MAP IDs A1, A2, and A3 identified the Subject Property in the EDR asbestos database. These entries appear to be a result of abatement work at the Subject Property that has been completed. Due to the age of the structures at the Subject Property, asbestos-containing materials (ACM) are likely to be present, unless they have previously been abated. **Based on the age of the structure and confirmed asbestos in some materials, ACM is considered a BER.** Trihydro performed a Phase II investigation into ACM. The ACM and results will be reported in a separate Phase II ESA for the North Valley Public Library.
- Map ID A4 identified the Subject Property in the EDR Spills database. This was a result of a renovation contractor prepping for painting by scraping suspect asbestos containing materials, and these materials were falling to the street and sidewalk. Impacts to air were primarily considered, and the status of the release is closed.

Numerous off-site properties were identified and reviewed within the specified ASTM search radius and are included in the Mapped Sites Summary of the EDR Radius Map Report that is included in Appendix D. The definitions of these databases are included in the ERIS Radius Map Report.

Based on the review, no potential off-site RECs, HRECs, or CRECs were identified with respect to the Subject Property.

Regulatory database information for the following properties located within ½-mile from the Subject Property is provided, along with comments regarding the Environmental Professional’s opinion of each entry:

EDR MAP ID	Property Address	Listed Entity	Listing/Status	Direction from Subject Property/Gradient
A5	202 Main Street	Stevi Cafe	Asbestos	Adjacent property to north
	Comment: Asbestos abatement. As the entry regards asbestos abatement in an adjacent building, this is not considered a REC with regards to the Subject Property.			
A6/B9/B10	2 nd and Main Street	Bitterroot Exxon / Farmers Exchange of Stevensville (currently Mountain West Co-op)	EDR Hist Auto/LUST/UST/REM Program	150 feet NNW, down-gradient
	Comment: This property appears to have been a petroleum service station since at least 1944 based on the Radius Map Report and Sanborn maps. According to the EPA UST Finder 7 tanks containing gasoline and diesel installed in 1977 and 1978 are in use at the property. At least two releases have been resolved, in 2012 and 2013. Due to the downgradient location, it is not considered a REC with regards to the Subject Property.			
A7	201 Main Street	Stevensville Distributing (currently UpNSmokin BBQ House)	UST	116 feet NW, down-gradient
	Comment: This property is reported to have 5 underground storage tanks containing gasoline and diesel installed in 1977 and removed in 1988. Due to the downgradient location, it is not considered a REC with regards to the Subject Property.			
B8	3238 E Railroad Street	CHS Mountain West Co-Op	RCRA-VSQG	150 feet NNW, down-gradient
	Comment: It is not clear from the database if this database entry is located at the Mountain West Co-op service station at 2 nd and Main Street or at the Mountain West Co-Op fertilizer terminal on Railroad Avenue. The service station is downgradient while the fertilizer terminal is potentially upgradient, but is located approximately 2,500 feet from the Subject Property. Violations or releases are not reported for this facility; it is included in the database as a small quantity generator of hazardous materials. This facility is not considered a REC regarding the Subject Property.			

EDR MAP ID	Property Address	Listed Entity	Listing/Status	Direction from Subject Property/Gradient
B11	108 Main Street	Mini Market	RCRA NONGEN	306 ft N, cross gradient
	Comment: There are no records of releases for this facility. Based on the property's location, it is not considered a REC.			
C12	300 Main Street	Stevensville First State Bank #705	LUST	387 ft SSW, cross gradient
	Comment: The LUST was resolved in 1990. Based on the property's location, it is not considered a REC.			
C13	314 Main Street	Stevensville Wash & Dry	EDR Hist Cleaner	537 ft SSW, cross gradient
	Comment: This facility was listed as a dry cleaner in 1994. City directory entries for 1992 and 1995 do not include a dry cleaner at this address. There is no evidence of a release. If a release did occur there is the potential this could be a REC for the Subject Property, but the distance and direction from the Subject Property make impacts unlikely.			
14	211 W 3 rd Street	Mission Mobile Home Park	RCRA NonGen/NLR	627 ft WSW, down or cross gradient
	Comment: No releases were reported for this facility. Based on the property's location, it is not considered a REC.			
D15/D16	324 Main Street	CJ's Den	UST/LUST	704 ft SSW, cross gradient
	Comment: This property has been a service station since at least 1948. Four USTs were removed in 1990, and three USTs containing gasoline were installed in 1990, which are temporarily out of service per the EPA UST Finder. One LUST was resolved in 2006. Based on the property's location, it is not considered a REC.			
17	407 Main Street	Northwest Livestock Co	UST, LUST	1,086 ft SSW, cross gradient
	Comment: This property is listed as having two USTs, removed in 1991 and 1993. A LUST was resolved in 1996. Based on the property's location, it is not considered a REC.			
18	NW of Stevensville	Bass Creek Post and Pole Plant	SEMS-Archive	5.2 miles NNW, downgradient
	Comment: This facility is located near Watt Lane and Bass Creek Road according to DEQ's GIS tool. It is a low priority site being addressed under DEQ's CECRA program. Based on the property's location, it is not considered a REC.			
19	110 1 st Ave	DC Petroleum Inc Bulk Plant	UST, LUST	0.48 miles E, up gradient
	Comment: Two USTs were removed from the site in 1995. The LUST was resolved in 2016. The property appears to be topographically upgradient of the Subject Property but is nearly cross gradient and impacts were unlikely to have affected the Subject Property. Based on the property's location, it is not considered a REC.			

4.1.3 ORPHAN SITES

The database report did not identify any “orphan” facilities (facilities that were not mapped by EDR in the database report due to poor or inadequate address information).

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The ASTM E 1527-21 standard provides for review and analysis of additional environmental record sources during the performance of a Phase I ESA at the discretion of the environmental professional. Relevant factors in evaluating whether additional environmental records sources should be reviewed include, but are not limited to:

- The completeness of data provided by standard environmental record sources.
- Whether additional environmental records sources are reasonably ascertainable.
- Whether additional environmental record sources are useful, accurate, and complete in light of the records review objectives.
- Whether additional environmental record sources are customarily obtained pursuant to the type of commercial real estate transaction involved.

4.3 VAPOR ENCROACHMENT SCREENING

Trihydro performed a vapor encroachment screening to evaluate the presence of Vapor Encroachment Conditions (VECs) in general compliance with ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E-2600-22). A VEC is the presence or likely presence of volatile chemicals of concern in the vadose zone caused by releases from contaminated soil and/or groundwater.

Two confirmed LUST sites (Mountain West Co-Op and Stevensville First State Bank #705) were identified within the 1/10-mile search radius for petroleum hydrocarbons. Mountain West Co-Op is located downgradient, Stevensville First State Bank #705 is cross-gradient, and both are greater than 100 ft from the Subject Property, indicating that vapor impacts from potential light non-aqueous phase liquid (LNAPL), if it were present, are unlikely. One UST site (Stevensville Distributing) is located at approximately 100 feet from the Subject Property, but is also downgradient and does not appear to have a documented release of petroleum hydrocarbons. Non-petroleum volatile chemicals of concern were not reported to be released within the 1/3-mile search radius, though one historical dry cleaner was potentially located within this distance (Stevensville Wash and Dry). This facility would have been approximately 500 feet from the Subject Property in a cross-gradient location. No releases have been reported for the Stevensville Wash and Dry. Vapor impacts to the Subject Property if a release did occur appear to be unlikely. Therefore, no VECs were identified for the Subject Property.

5.0 RESULTS OF SITE RECONNAISSANCE

Between April 8 and 11, 2023, a visual reconnaissance of the Subject Property was performed by Mr. Joel Riebli and Mr. Casey Hooton, Environmental Professionals within Trihydro. This report was prepared by Mr. Connor Elbert, Mr. Andrew Vann, and Mr. Joel Riebli, also Environmental Professionals within Trihydro. Documentation of professional experience and a statement certifying the qualifications as an Environmental Professional for Mr. Riebli, Mr. Hooton, Mr. Elbert, and Mr. Vann are included in Appendix K. The Subject Property was inspected by conducting a walking reconnaissance of the site boundaries, observing the Subject Property and surrounding areas from both a vehicle and on foot, and taking photographs of site conditions.

5.1 SITE RECONNAISSANCE

Observations were made regarding the current Subject Property use and conditions. At the time of the site walk the weather conditions were sunny with a temperature of approximately 50°F. A general evaluation of the site drainage was conducted, as well. The Subject Property features were visually inspected to evaluate the presence of aboveground storage tanks (ASTs)/underground storage tanks (USTs), potential polychlorinated biphenyl (PCB)-containing materials, railroads, water and oil/gas wells, pipelines, and utilities. The site reconnaissance was made in an attempt to identify apparent indications of past or present activities that could have potentially contaminated the Subject Property and if the potential contamination could result in vapor intrusion concerns. Photographs documenting conditions of the Subject Property during the site reconnaissance are included in Appendix B. A general description of the overall findings is included below.

5.1.1 CURRENT USE AND DESCRIPTION OF SUBJECT PROPERTY

The Subject Property is currently utilized as mostly as a library but does contain an art room and conference room. During the site visit, the exterior and street level areas appeared to have been remodeled or upgraded in the last 20 years. One of the basement areas has a modern membrane installed to cover concrete flooring, whereas a second basement area has minor amounts of drywall, peg board, and painted surfaces. The upper floor area appears dated with the plaster / drywall walls covered by multiple types of wallpaper, exposed electrical wiring, approximately 12-18 inches of loose insulation covering multiple types of carpet, and black tar from the asphalt roofing. The attic above the upper floor was observed with loose insulation and black tar penetrating from the upper roof.

5.1.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCT STORAGE AND USE

No hazardous substances or petroleum products were observed during the site visit.

5.1.3 SOLID AND HAZARDOUS WASTE

The Subject Property was observed to be serviced by municipal trash disposal.

5.1.4 UNDERGROUND STORAGE TANKS

No evidence of historical or current USTs were observed (i.e., fill pipes, vents, patched concrete, etc.).

5.1.5 ABOVEGROUND STORAGE TANKS

None observed.

5.1.6 WASTEWATER

The building is connected to the municipal sewer system, with the wastewater piping exiting the building on the eastern side of the added-on bathroom area. The wastewater is presumably limited to sewage and typical building wastewater discharge.

5.1.7 STORMWATER AND SURFACE DRAINAGE

Stormwater and surface water appear to be diverted along stormwater gutters and discharges on to multiple areas in the employee dirt parking lot behind the library. A surface drain was observed in the low point of the employee parking lot near the pink paint portion of the back of the library.

5.1.8 POLYCHLORINATED BIPHENYLS

The production of PCBs was banned in the United States in 1979. Prior to that time, PCBs were commonly used as dielectric and coolant fluids in electrical equipment such as transformers and fluorescent light ballasts. No transformers or ballasts were observed at the Subject Property.

5.1.9 LANDFILLS

No landfills were observed on-site or identified within a 1.0-mile radius of the Subject Property.

5.1.10 SURFACE IMPOUNDMENTS

No impoundments were observed on-site.

5.1.11 RAILROADS

No railroads or spurs were observed on-site.

5.1.12 WATER WELLS

No water wells were observed or reported on the Subject Property. Based upon the EDR Radius Map Report provided in Appendix 6, 66 permitted water wells were identified within a 1-mile radius of the Subject Property.

5.1.13 OIL AND GAS WELLS

No oil and gas wells were observed during the site reconnaissance. Based upon the EDR Radius Map Report provided in Appendix B, no oil/gas well was identified within 1-mile of the Subject Property.

5.1.14 PIPELINES

No pipelines were observed during the site reconnaissance.

5.1.15 UTILITIES

The assistant librarian did not disclose who provides utilities at the Subject Property; however, an area search indicates that NorthWestern Energy provides electricity and natural gas service in Stevensville. It also appears that the Town of Stevensville provides water and sewage. On the alley side of the library buildings, multiple natural gas meters, electrical drops, communication lines, and cooling units were observed. Additionally, a water meter was observed along with the wastewater line in a bathroom closet in the 1960's remodel. In the low spot of the employee parking lot surface water from the dirt lot drains into a surface drain.

5.1.16 EVIDENCE OF ON-SITE RELEASES

No evidence of on-site releases was observed during the site reconnaissance visit.

5.2 SURROUNDING PROPERTIES RECONNAISSANCE

As shown on Figure 2, by the aerial photographs in Appendix G, and the historic topographic maps in Appendix C, the Subject Property is currently utilized as the local public library. The adjacent properties are as follows:

- North: 2nd Street, commercial buildings
- East: Alley, residential

- South: Commercial building
- West: Main Street, commercial buildings

At the time of the site reconnaissance, no obvious evidence of releases or environmental issues were observed on the adjoining properties.

6.0 CONCLUSIONS

6.1 PHASE I ESA

Trihydro Corporation (Trihydro) performed Phase I Environmental Site Assessment (ESA) for DEQ on the property located at 208 Main Street, Stevensville, Montana (Subject Property). The building is a combination of three older buildings and one new addition. A second floor is present in one area of the structure and two basement areas are present.

Trihydro visited the Subject Property to perform the ESA on April 8 through 11, 2023. The scope of services for this ESA and the performance of the professional services rendered were in general accordance with the current industry practices, as conducted by similarly qualified practitioners. The scope of work included the general provisions of the American Society for Testing and Materials (ASTM) Standard E 1527-21, *Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment*.

This Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the potential for *recognized environmental conditions* (RECs), *historic RECs* (HRECs), *controlled RECs* (CRECs), business environmental risk (BER) and/or potential environmental compliance issues in connection with the Subject Property. Based upon the site observations conducted on April 8 through 11, 2023, interviews of key personnel, and data file reviews, one BER was identified. Due to the age of the buildings, ACM may be present and previous abatement activities have occurred. A Phase II including ACM sampling was performed and will be submitted under separate cover. The potential for ACM is considered a BER.

Based on the results of the Phase I ESA Report, no additional investigation beyond the 2023 Phase II ESA including ACM and lead-based paint is recommended for the Subject Property.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 1. April 11, 2023. Outside looking east: Front entrance for the North Valley Public Library, a combination of three buildings plus an addition on the alley side. The main entrance is located on the yellow two-story building. The orange and red painted building are also part of the library. The buildings ages range from 1910 and 1940; a remodel and addition were performed in 1960.

Photo 2. April 11, 2023. Outside looking east: The main entrance to the library.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 3. April 11, 2023. Outside looking southeast: Community room entrance.

Photo 4. April 11, 2023. Outside looking southwest: The alley side of the North Valley Public Library (tan, red, and pink structures).

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 5. April 11, 2023. Outside looking west: The two yellow doors are employee entrances / emergency exits from the library. Concrete wall between second story and left yellow door. Block walls on majority of tan and pink walls. The ground between the building and alleyway are soil covered and receive the entire run off from the roofs.

Photo 6. April 11, 2023. Outside looking west: ally side of the “Montana room” (tan room), boarded up storage closet (white door), and utilities (natural gas, electrical, telephone, and cooling) penetrating wood exterior walls. The southern and northern walls are concrete. Roofing (asphalt on pitch and membrane east to west sides) drainage discharging into gutters then onto the ground surface.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 7. April 10, 2023. Outside on roof. Looking northeast from on the central building roof: Run off drains eastward towards the alley, is collected in gutters, before being discharged into the dirt park area.

Photo 8. April 11, 2023. Street level. Main library room with white plaster walls / ceiling, multiple carpets covering wood and concrete flooring.

**APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT**

Photo 9. April 11, 2023. Street level. Main library room with modern heating and cooling unit.

Photo 10. April 11, 2023. Street level. "Montana Room" with access to one section of the basement and emergency exit. Green plaster walls with ceiling tiles. Minor amount of loose insulation above ceiling tiles. Basement has drywall storage rooms, peg board, brick columns, and painted concrete.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 11. April 11, 2023. Street level. Computer station room with an access to a portion of the basement (square on blue carpet). White painted drywall and ceiling tiles. Wood and concrete beneath carpet. Basement has membrane on floor and a few feet up the walls with concrete walls and brick columns.

Photo 12. April 12, 2023. Street level. Kids room. Light blue painted drywall and ceiling tiles, same materials that are present in the computer station room. Concrete beneath carpet.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 13. April 11, 2023. Street level. Community room with meeting taking place. White painted plaster / drywall and ceiling tiles. The drywall and ceiling tiles are the same materials as in the computer station and kid's rooms. Concrete beneath carpet.

Photo 14. April 11, 2023. Street level. Art room with heating / cooling and breaker box. White painted block and drywall, with similar ceiling tiles to neighboring rooms. Painted concrete flooring. Bathroom are through the central opening where water meter, sewer, and water heater are in bathroom closet.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 15. April 11, 2023. Street level. Staff kitchen and break room. Concrete flooring, with drywall walls and ceiling.

Photo 16. April 11, 2023. Stairwell to first floor above main library portion of the building. Carpeted stairs with wallpaper covering plaster walls on the right side and concrete walls on the left side. Doorway on top of stairwell leads to storage area.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 17. April 11, 2023. First floor: approximately 12 to 18 inches of loose insulation covering the entire upper-level floor. Beneath the insulation is various carpeted flooring. Walls are covered in multiple styles of wallpaper which is covering plaster or drywall walls and ceiling.

Photo 18. April 11, 2023. First floor: approximately 12 to 18 inches of loose insulation carpeted floors. Upper floor bathroom behind doorway with shower. Multiple types of wallpaper covering drywall walls and ceilings.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 19. April 11, 2023. First floor: approximately 12 to 18 inches of loose insulation covering the carpeted floor. Multiple doors being stored in room next to bathroom. Wallpaper covering drywall walls and ceiling.

Photo 20. April 11, 2023. First floor, eastern side: utilities and access to attic.

APPENDIX B. SITE PHOTOGRAPHS
208 MAIN STREET, STEVENSVILLE, MONTANA, NORTH VALLEY PUBLIC LIBRARY
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Photo 21. April 11, 2023. First Floor attic: wood framed attic with loose insulation, black tar from roof, and utilities running over trusses.

Photo 22. April 11, 2023. First floor storage room: black tar from asphalt roofing on wood ceiling and trusses. Concrete wall. Loose asphalt shingles on floor (off image of photo).

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Trihydro were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
BASS CREEK POST & PO Site ID: 0800468 EPA Id: MTD980960421	NW OF STEVENSVILLE	SE 1/4 - 1/2 (0.348 mi.)	18	25

Lists of Federal RCRA generators

RCRA-VSQQ: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQQ list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-VSQQ site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include

EXECUTIVE SUMMARY

gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

FARMERS EXCH OF STEV	115 MAIN ST	NNW 0 - 1/8 (0.040 mi.)	B9	15

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: 303-312-6149

Lists of state- and tribal (Superfund) equivalent sites

SHWS: CECRA (Non-NPL) Priority Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

PFAS: PFOA & PFOS Site Listing

Perfluorinated Compounds (PFCs) are a very large group (more than 3000) of human-made chemicals that contain at least one fluorine atom. The family of PFCs has widely differing physical, chemical and biological properties, but are principally known for their ability to impart stain/water resistant properties to products. PFCs are used in automotive, electronics, firefighting and construction industries.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene
Code: Tmc (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: SAYPO
Soil Surface Texture: loam
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
2	7 inches	15 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.90
3	15 inches	48 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 8.40 Min: 7.90
4	48 inches	60 inches	clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 8.40 Min: 7.90

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: cobbly - loam
 very cobbly - sandy loam
 silt loam
 mucky-peat
 cobbly - sandy loam

Surficial Soil Types: cobbly - loam
 very cobbly - sandy loam
 silt loam
 mucky-peat
 cobbly - sandy loam

Shallow Soil Types: silty clay loam
 mucky-peat
 loam

Deeper Soil Types: extremely cobbly - loamy sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

stratified
 very gravelly - loam
 extremely gravelly - loamy coarse sand
 very gravelly - loamy sand
 gravelly - clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland and Riparian Framework

Source: Natural Heritage Program

Telephone: 406-444-0915

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Site Name:

Stevensville Library
208 Main Street
Stevensville, MT 59870
EDR Inquiry # 7240234.3

Client Name:

Trihydro
1252 Commerce Drive
Laramie, WY 82070
Contact: Luke Darnell

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Trihydro were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: CF10-4D80-B7AB

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Trihydro (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

APPENDIX J

USER QUESTIONNAIRE

USER QUESTIONNAIRE

INTRODUCTION

In order to qualify for one of the Landowner Liability Protections ("LLPs") offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. The respondent is welcome to provide supporting documentation as attachments.

QUESTIONS

1.	Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? If yes, please provide details and copies of supporting documents.	
Yes	<input type="checkbox"/>
No	<input checked="" type="checkbox"/>

2.	Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any Activity & Use Limitations such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? If yes, please provide details and copies of supporting documents.	
Yes	<input checked="" type="checkbox"/>
No	<input type="checkbox"/>
The second story can not store any items as loose insulation is covering the flooring. Posted not to store any items in the area. Not sure if registered under any of those laws.	

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).	
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? If yes, please provide details and copies of supporting documents.	
Yes	<input type="checkbox"/>
No	<input checked="" type="checkbox"/>
<p>Prior use up stairs was a wallpaper store, the lower levels have been different types of business before becoming the library. Not aware of chemicals associated with those</p>	

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?	
If you conclude that the value is lower than the fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? If you determined that contamination is believed to be the reason for the low purchase price, please provide details and copies of supporting documents.	
Yes	<input checked="" type="checkbox"/>
No	<input type="checkbox"/>
<p>Was before I started work at the library</p>	

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a) Do you know the past uses of the property? If yes, please provide details.

Yes	<input checked="" type="checkbox"/>	The insulation above the Mantana room had asbestos in the insulation
No	<input type="checkbox"/>	

(b) Do you know of specific chemicals that are present or once were present at the property? If yes, please provide details.

Yes	<input type="checkbox"/>
No	<input checked="" type="checkbox"/>

(c) Do you know of spills or other chemical releases that have taken place at the property? If yes, please provide details.

Yes	<input type="checkbox"/>
No	<input checked="" type="checkbox"/>

(d) Do you know of any environmental cleanups that have taken place at the property? If yes, please provide details.

Yes	<input checked="" type="checkbox"/>	Insulate was removed above the Mantana Room
No	<input type="checkbox"/>	

6.	The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).	
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? If yes, please provide details and copies of supporting documents.		
Yes	<input type="checkbox"/>	
No	<input checked="" type="checkbox"/>	

7.	Why is a Phase I ESA required?
The library might move to a different location and the building would be put up for sale.	

8.	Please identify the type of property, type of property transaction (for example, sale, purchase, exchange), and use of property following transaction (for example, same as current, demolition, rehabilitation).
Same as current	

9.	Please provide a complete and correct address for the property (a map or other documentation showing property location and boundaries is helpful). Is a site location map attached?	
Yes	<input type="checkbox"/>	208 Main Street Stevensville, MT 59870 (406) 777-5061
No	<input type="checkbox"/>	

10. What services are required?		
Please Check All That Apply		Comments
ASTM 1527-05 (Former Standard)		
ASTM 1527-13 (All Appropriate Inquiry – Current)	X	
ASTM 1527-21 (Pending AAI – Current)	X	
ASTM 2247-16 (Forestland or Rural Property – Current)		
Asbestos Containing Materials	X	
Lead Based Paint	X	
Lead in Drinking Water		
High Voltage Power Lines		
Wet Utility Audit		
Lender-Specific Scope of Work		
Please list Lender (e.g., Fannie Mae)		
Other (Please Describe)		

11. Please list the full name and address for each party that will rely upon the Phase I ESA Report.	
Stevensville Library, 208 Main Street, Stevensville, MT 59870	

12. Please identify one or more site contacts and how each can best be reached.	
Denise Ard, Library Director, (406) 777-5061 Denisea@northvalleylibrary.org	

13. Please list any special terms and conditions, which must be agreed upon by the environmental professional.	

14.	<p>Please provide any other knowledge or experience with the property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition).</p>
<p>NONE</p>	

This ASTM E1527-21/ASTM E1527-13 Questionnaire was completed for the following property:

Stevensville Library	208 Main Street
Property Name	Address

APPENDIX K

BUILDING INSPECTOR CREDENTIALS

JOEL RIEBLI

Environmental Engineer

LICENSES

Certified Montana Asbestos Inspector

EXPERTISE

- Project Manager
- Field Environmental Engineer
- Health and Safety Coordinator

EDUCATION

Northern Arizona University:
B.S./1999/Environmental Engineering;
Minor in Chemistry

BIO

Mr. Riebli has over eighteen years of experience in environmental consulting including site remediation, soil, vapor, and groundwater monitoring, enhanced bioremediation injections, site supervision, asbestos material sampling, and project management. Throughout his professional career, Mr. Riebli has served roles including quality control supervisor, health and safety officer, and senior field technician.

EXPERIENCE

STORAGE TANK PROGRAM • STATEWIDE WYOMING • JUNE 2010 – ONGOING

Project Manager

Project Manager for the Wyoming DEQ Storage Tank Program in Wyoming. Responsibilities include reporting, contractor management, monitoring and treatment well installation, development, sampling, enhanced bioremediation injections, vapor intrusion monitoring, air sparge / soil vapor extraction / groundwater extraction system operation and maintenance, remediation system and monitoring well decommissioning of multiple gasoline and diesel fuel tank release sites.

SOLVENT SITES - STATE SUPERFUND SITES • BILLINGS, HAVRE, AND WHITEFISH, MONTANA • SEPTEMBER 2015 – ONGOING

Project Engineer

The Montana Department of Environmental Quality is conducting remedial investigations into the nature and extent of contamination due to solvent releases to the subsurface in Billings, Havre, and Whitefish, Montana. As part of the investigation, Trihydro was tasked with providing engineering and environmental compliance services for the site. Tasks assigned to Trihydro include site investigation and conceptual site model development, implemented remedial enhanced bioremediation injections and soil vapor extraction treatment systems (Havre and Whitefish). As a project engineer, Joel has managed field remedial investigation activities, coordinated oversight of subcontractors, installed monitoring wells and injections and maintained remediation systems, conducted vapor and groundwater sampling, and liaised with state and local government agencies.

FORMER REFINERY – STATE SUPERFUND SITE • SUNBRUST, MONTANA • SEPTEMBER 2009 – FEBRUARY 2018

Field Engineer

Trihydro has provided environmental compliance assistance since 1997 associated with the assessment, demolition, and remediation of a former petroleum refinery located in northern Montana. Working under Montana's Voluntary Cleanup and Recovery program requirements, Trihydro has worked closely with DEQ to prepare a

VCP for the site and conducted the VCP activities. These activities have included the removal of surface and underground piping, removal of foundations, structures, debris, impacted soils (hydrocarbon contamination including hazardous concentrations of lead and benzene), asbestos, and hydrocarbon recovery from groundwater. In addition, Trihydro has conducted a Supplemental Site Investigation with the residential area of town to evaluate existing soil and groundwater conditions and is currently working with the client and DEQ on a Facility-wide Phase II RI. Joel has been responsible for many facets of the project including: coordination/oversight of subcontractors, preparation of reports, coordination of activities with the property owners, drilling oversight, hydrocarbon recovery, soil/groundwater/surface water/property reclamation, building/structure reconstruction, asbestos sampling, building demolition, and operating a mobile treatment unit (activated carbon, air stripper, and soil vapor extraction).

MILWAUKEE ROUNDHOUSE • DEER LODGE, MONTANA • APRIL 2014 - SEPTEMBER 2016

Field Engineer

Project Engineer for the Montana DEQ project. The Milwaukee Roundhouse is a 50 acre former railroad maintenance and refueling facility impacted by various contaminants including petroleum hydrocarbons, metals, PCBs, and solvents. Sources include former above ground and underground storage tanks, surface spills, and piping leaks. The Remedial Investigation focused on delineation of nature and extent of contamination, and evaluation of risks to human health and the environment. Trihydro collected soil, groundwater, surface water, soil vapor, and sediment samples for laboratory analysis. Trihydro also performed aquifer testing, geophysical surveys, and topographic surveys. Joel was responsible for management of subcontractors, collecting possible asbestos containing materials, soil and groundwater sampling.

ACTIVE REFINERY REMEDIAL TECHNOLOGY EVALUATION AND RESPONSE • WESTERN MONTANA • OCTOBER 2015 – ONGOING

Field Engineer

Trihydro provided environmental hazardous waste support during a refinery turnaround and continued environmental support of an active refinery in Western Montana. Joel's responsible for the turnaround included management of excavation and drilling subcontractors, collection of vapor, groundwater, soil, hydrocarbon recovery, waste materials, and compliance sampling.

CERTIFICATE OF ACHIEVEMENT

This certificate is awarded to:

JOEL RIEBLI

Has successfully completed the required training hours and satisfactorily passed the examination for the initial course entitled:

LEAD-BASED PAINT INSPECTOR

For the purposes of accreditation under Colorado Regulation No. 19, Residential Lead-based Paint Hazard Reduction Act of 1992 (Title X), and other standards developed by the EPA pursuant to Title IV of TSCA.

COURSE DATES:	AUGUST 8 - 10, 2022
EXAMINATION DATE:	AUGUST 10, 2022
INTERIM EXPIRATION DATE:	6 MONTHS FROM EXAMINATION DATE
EXPIRATION DATE:	AUGUST 10, 2025
COURSE HOURS:	24.0

Renew this Certificate

JOEL W RIEBLI

has met the requirements of Montana Administrative Rule 17.74.362 and/or 17.74.363 for accreditation in the following asbestos occupation(s) through the specified expiration date(s).

Asbestos Inspector

04/15/2023

MT DEQ Asbestos Control Program

CASEY HOOTON

Assistant Staff Geologist/Hydrogeologist

EXPERTISE

- OGI Camera Operator
- Cooling Tower Water Testing, El Paso Method
- LDAR
- Manlift Operator

EDUCATION

Utah State University:
BS/2018/Geology

BIO

Mr. Hooton started with Trihydro in 2019 as a leak detection and repair (LDAR) Technician. Mr. Hooton's environmental experience with Trihydro has included LDAR program management, Optical Gas Imaging (OGI) Camera Operation, and Refinery Cooling Water Testing. Currently, Mr. Hooton is working as an Assistant Staff Geologist in our Helena, Montana office.

Before joining Trihydro, Mr. Hooton worked as commercial pesticide applicator.

EXPERIENCE

LDAR PROGRAM MANAGEMENT, ACTIVE REFINERY • SALT LAKE CITY, UTAH • 2019 -2021

Lead LDAR Technician

Using toxic vapor analyzers (TVA), Mr. Hooton monitors all covered equipment containing volatile organic compounds for leaks and coordinate repairs with client to ensure they are corrected in a timely manner and in accordance with state and federal mandates. He also performs daily record keeping of monitored equipment and TVA calibrations in accordance with Environmental Protection Agency mandates. He is responsible for monthly OGI requirements with FLIR Camera and for monthly cooling water testing for VOCs using El Paso Cooling Tower Method.

HELENA TERMINAL REMEDIATION • HELENA, MONTANA • MAY 2018 - ONGOING

Assistant Geologist

Assisting with groundwater/soil remediation project. Installing air sparge wells and soil vapor extraction points as part of pilot remediation program.

GL09 REMEDIATION • MAY 2021 – ONGOING

Assistant Geologist

Assisting with remediation project involving light non-aqueous phase liquid (LNAPL) contamination, including contractor oversight and water sampling/monitoring. Assisted with laser-induced fluorescence (LIF) investigation.

ANDREW VANN, PE

Contract Manager Project PEs

BIO

Mr. Vann is a Lead Project Engineer based in Trihydro's Fort Collins, Colorado office. His work experience in the environmental industry has primarily involved site assessments, investigations, and remediation. His experience includes design and implementation of site assessment and remediation programs, management of remedial operation and maintenance activities, design of remediation systems and injections, generation of remedial action plans, evaluation of environmental contaminant fate and transport, regulatory agency compliance, and project /contract management. His primary responsibilities include management of projects including remedial investigation, remedy design, remedy implementation, and long-term operation, maintenance, and monitoring of contaminated sites.

Mr. Vann has served as Project Manager for numerous investigation and remediation projects. He has also served as Project Engineer responsible for the design, installation, and operation of a variety of active and passive remedial technologies including excavation, chemical oxidant/enhanced bioremediation injections, soil vapor and groundwater extraction systems, air/biosparge systems, and subsurface barriers.

LICENSES

Professional Engineer:
#12100, Wyoming
#19666, Montana
#E-15674, Nebraska

Recognized Environmental
Professional: Colorado Division of Oil
and Public Safety

EDUCATION

University of Colorado:
BS/2004/Environmental Engineering

EXPERIENCE

MILWAUKEE ROUNDHOUSE REMEDIAL INVESTIGATION AND INTERIM REMEDIAL ACTION • DEER LODGE, MONTANA

Project Manager

The Milwaukee Roundhouse is a 50-acre former railroad maintenance and refueling facility impacted by various contaminants including petroleum hydrocarbons, metals, PCBs, and solvents. Sources include former above ground and underground storage tanks, surface spills, piping leaks, industrial dumps, and buried debris. The Remedial Investigation focused on delineation of nature and extent of contamination, and evaluation of risks to human health and the environment. Trihydro collected soil, groundwater, surface water, soil vapor, and sediment samples for laboratory analysis and managed, validated, and reported the resulting data. Mr. Vann was responsible for project management, including management of field personnel and subcontractors, data validation, and reporting tasks.

Based on the Remedial Investigation, Trihydro was awarded an additional task order to perform interim remedial actions including excavation and offsite disposal of metals and petroleum contaminated soil, UST removal, indoor air surveys, and additional sampling of residential areas adjacent to areas of known contamination. Mr. Vann was responsible for designing excavations, management of

EXPERTISE

- Monitoring Well Installation
- Environmental Site Assessments
- Remedial Design
- Construction Management and Oversight

subcontractors and field personnel, confirmation sampling, data validation, and reporting tasks.

REMEDIAL INVESTIGATION • BILLINGS PCE GROUNDWATER FACILITY • BILLINGS, MONTANA

Project Manager

Mr. Vann was the project manager responsible for remedial investigation (RI) at the Billings PCE Groundwater Facility, an 855-acre chlorinated solvent facility in Billings, Montana. The RI focused on evaluating the nature and extent of chlorinated solvent contamination, and delineation of known and potential solvent source areas and potential releases associated with industrial and dry-cleaning facilities. The RI included a comprehensive investigation of soil (using MIHPT and direct push borings), groundwater, and the potential for vapor intrusion, including soil vapor/indoor air sampling at 49 properties.

LARAMIE THIRD STREET SUBSURFACE REMEDIATION PROJECT • LARAMIE, WYOMING

Project Manager/Engineer

Trihydro investigated 31 sites in along and near 3rd Street in Laramie to delineate the nature, magnitude, and extent of contamination associated with petroleum underground storage tanks (USTs). Trihydro designed 25 active remediation systems using soil vapor extraction (SVE), groundwater extraction (GWE), multiphase vacuum extraction (MPVE), and vacuum-enhanced recovery (VER), and oversaw construction of the systems, which was completed in 1999. Since that time, Trihydro has recommended and obtained closure for 24 sites, and shut down 22 systems as their treatment areas reached restoration standards or the limits of technology effectiveness. Trihydro has redesigned 4 of the remaining systems to more effectively address remaining contamination and/or new releases, and has designed and implemented in-situ chemical oxidation (ISCO) and/or enhanced bioremediation injections for 11 sites (4 of which have been closed). As the Project Manager and Engineer, Mr. Vann was responsible for responsible for the design of remediation systems and decommissioning, construction oversight, and operation, maintenance and monitoring, as well as design and implementation of ISCO and enhanced bioremediation injections.

RAWLINS 2 SUBSURFACE REMEDIATION PROJECT • RAWLINS, WYOMING

Project Manager/Engineer

Trihydro conducted environmental site assessments at 13 project sites to evaluate the extent of hydrocarbon impacts from former and active USTs. Following the site assessments, Trihydro conducted pilot testing and developed remedial actions plans for nine of the sites with soil and/or groundwater impacts exceeding the WDEQ restoration standards. Based on the evaluation of remedial alternatives, four air sparge/SVE systems were installed, along with ISCO and/or bioremediation injections for five of the sites. As Project Engineer, Mr. Vann was responsible for managing investigation, pilot testing, construction, and operation and maintenance for the sites, as well as implementation of remediation injections.

CONNOR ELBERT

Geologist

EXPERTISE

- Site Assessments
- Regulatory Compliance
- Geology/Groundwater Hydrology

EDUCATION

University of Wyoming
2018

TRAINING

- 40-hour HAZWOPER 1910.120 (e)
- 10-hour OSHA Construction

BIO

Mr. Elbert is a geologist with three years of experience in the environmental industry. His project experience includes subsurface investigation, groundwater monitoring, water well development, vapor sampling, drilling oversight, and routine monitoring of fugitive emissions at natural gas processing plants.

Mr. Elbert has experience in various investigative techniques in diverse and complex subsurface conditions. His background includes operation and maintenance of remediation systems, geologic subsurface investigation, and Leak Detection and Repair (LDAR) program coordination. He has developed safety readiness reviews and safety observation reports for several projects during his tenure with Trihydro.

EXPERIENCE

WESTON COUNTY SOLID WASTE DISTRICT, WESTON COUNTY, WYOMING Field Geologist

Mr. Elbert was responsible for developing a pre-fieldwork safety readiness review for the site assessment and soil characterization at a proposed landfill in Wyoming, including comprehensive surface and subsurface investigation.

WYOMING DEQ, WYOMING Field Geologist

Mr. Elbert was responsible for including developing a pre-fieldwork safety readiness review, field assessment, groundwater remedy evaluation and implementation, remedial construction oversight, remedial chemical injection oversight, and preparation of technical reports.

WYOMING DEQ, WESTON COUNTY, WYOMING Field Geologist

Mr. Elbert was responsible for developing a pre-fieldwork safety readiness review for the installation and sampling of groundwater monitoring wells, air sparging wells, and soil vapor extraction wells to remediate sites and evaluate plume migration in Wyoming.
